

LegalEase: AI-Powered Legal Document Generator

Phase 2: Requirement Analysis Phase

Identifying the functional and non-functional requirements of the LegalEase system.

Project Phase Details

Area	Details
Functional Requirements	User input form, document-type selection, AI document generation, preview, editing, and document download.
AI Requirement	The system should process user-provided information and generate a structured draft based on the selected document type.
User Interface	The interface should be simple, readable, responsive, and easy to navigate.
Backend Requirements	The backend should receive requests, validate inputs, communicate with the AI service, and return generated content.
Non-Functional Requirements	Usability, reasonable response time, reliability, maintainability, and basic data protection.
Expected Outcome	A documented set of system requirements that guides design and development.

Phase Outcome

This phase contributes to the development of LegalEase by completing the activities described above and preparing the project for the next phase.

Academic Project Note: LegalEase is an AI-assisted drafting project. It does not replace professional legal advice, legal review, or applicable local legal requirements.
