

LegalEase: AI-Powered Legal Document Generator

Phase 3: Project Design Phase

Designing the architecture, user interface, database/data flow, and overall workflow of LegalEase.

Project Phase Details

Area	Details
System Architecture	Plan the frontend, backend/API layer, AI integration, and document-generation flow.
UI Design	Design pages for home, document selection, input form, generation, preview, and download.
Data Flow	User input → validation → backend/API → AI processing → generated draft → preview → download.
Document Structure	Define consistent headings, clauses, sections, placeholders, and formatting for generated documents.
Error Handling	Design messages for missing fields, invalid input, failed generation, and unavailable services.
Expected Outcome	A complete technical and interface design that can be implemented during development.

Phase Outcome

This phase contributes to the development of LegalEase by completing the activities described above and preparing the project for the next phase.

Academic Project Note: LegalEase is an AI-assisted drafting project. It does not replace professional legal advice, legal review, or applicable local legal requirements.
