

LegalEase: AI-Powered Legal Document Generator

Phase 5: Project Development Phase

Implementing the LegalEase application according to the approved requirements and design.

Project Phase Details

Area	Details
Frontend Development	Create the user interface for selecting document types, entering information, generating documents, and viewing results.
Backend Development	Implement APIs and server-side logic for validation, processing requests, and returning generated content.
AI Integration	Connect the application to an appropriate AI service and design prompts that produce structured drafts.
Document Generation	Convert generated content into a readable document format with headings, sections, and consistent formatting.
Integration	Connect frontend, backend, AI service, and document-generation components into one workflow.
Expected Outcome	A functional LegalEase prototype/application that can generate legal-document drafts.

Phase Outcome

This phase contributes to the development of LegalEase by completing the activities described above and preparing the project for the next phase.

Academic Project Note: LegalEase is an AI-assisted drafting project. It does not replace professional legal advice, legal review, or applicable local legal requirements.
