

LegalEase: AI-Powered Legal Document Generator

Phase 6: Project Testing Phase

Checking whether LegalEase works correctly, reliably, and according to its requirements.

Project Phase Details

Area	Details
Functional Testing	Test document selection, form submission, AI generation, preview, editing, and download.
Input Validation	Check empty fields, incorrect values, incomplete information, and unexpected input.
AI Output Testing	Verify that generated drafts follow the requested document type and contain the supplied information.
UI Testing	Check navigation, buttons, forms, layout, responsiveness, and readability.
Error Testing	Test API failures, unavailable services, generation errors, and recovery messages.
Expected Outcome	Identify and fix defects so that the application is stable enough for demonstration.

Phase Outcome

This phase contributes to the development of LegalEase by completing the activities described above and preparing the project for the next phase.

Academic Project Note: LegalEase is an AI-assisted drafting project. It does not replace professional legal advice, legal review, or applicable local legal requirements.
