

LegalEase: AI-Powered Legal Document Generator

Phase 7: Project Documentation Phase

Preparing the written records required to explain the LegalEase project, its development, and its results.

Project Phase Details

Area	Details
Project Introduction	Explain the purpose of LegalEase and the problem it addresses.
Requirements	Document functional and non-functional requirements.
System Design	Include architecture, workflow, data flow, UI descriptions, and relevant diagrams.
Implementation	Describe technologies, modules, AI integration, document generation, and important implementation steps.
Testing	Record test cases, expected results, actual results, and corrections made.
Limitations & Future Scope	State that generated documents are drafts and describe possible future improvements such as more templates, stronger validation, and additional document formats.
Expected Outcome	A complete project report and supporting records for academic submission.

Phase Outcome

This phase contributes to the development of LegalEase by completing the activities described above and preparing the project for the next phase.

Academic Project Note: LegalEase is an AI-assisted drafting project. It does not replace professional legal advice, legal review, or applicable local legal requirements.
